EDUCATION

HND in software engineering

esoft metro campus

Fullstack development certification

moratuwa university

Public speaking in english

American conner kandy

Advance level in mathematics

Vidyarthi college kandy

SKILLS

- Version control
- Programming
- self learning
- Critical Thinking
- Communication Skills
- Team Work
- Problem solving

LANGUAGE

- English
- Sinhala

PROFILE

Software Engineering undergraduate with self-taught proficiency in Java, Spring Boot, React, Next.js, and Tailwind CSS. I've developed personal projects demonstrating practical backend API development and responsive frontend implementation. I bring a relentless ability to learn new technologies fast and adapt to challenges ready to immediately contribute my skills and growth mindset to your development team

PROJECTS

Service Market Backend

Developed a backend system using Java Spring Boot to connect service providers with household owners. Managed entity relationships, implemented database versioning with Flyway, utilized Lombok and DevTools for efficient development, and conducted profiling to enhance performance. Currently integrating Keycloak to strengthen authentication and authorization. Implemented SonarLint for code quality analysis to maintain clean, consistent code and identify potential issues early in the development cycle, ensuring adherence to coding standards and best practices.

Nestify (Frontend)

Built the frontend for the Service Market platform using Next.js, React, Tailwind CSS, and React Icons. Designed a responsive, intuitive user interface that communicates seamlessly with the backend, ensuring smooth service booking and provider interactions.
